

## Production Quality Assurance Coordinator

Protalix is a biopharmaceutical company focused on the development, production, and commercialization of recombinant therapeutic proteins produced by our proprietary ProCellEx® plant cell-based protein expression system. The company is located in the Science Park in Karmiel and has 200 employees.

We are looking for a QA coordinator to the QA Production department.

### Job Description:

- Reviewing batch records prior to the product's release
- Writing, reviewing and approving production documents, such as master manufacturing instructions, SOPs and risk assessments
- Reviewing and approving change controls
- Managing and leading QA projects from time to time
- Performing quality audits to the Production department to assure they follow relevant procedures and work in compliance with GMP

The role involves proactive input into changes in working practices within the departments with a view to improve the quality of the work.

### Job Requirements:

- B.SC/BA in any of the following or similar: Pharmacy, Biology, Biotechnology , Life sciences
- Essential: Self-motivated , strong interpersonal and communication skills verbally and in writing, English and Hebrew
- Essential: Attention to details
- Essential: Ability to work collaboratively as well as independently
- Preferred: QA experience in the pharmaceutical/biopharmaceutical/food industry
