

Food Technologist engineer

The Ripples Team is looking for a Food Technologist to join our growing team!

We develop innovative food products that used as edible ink for printing high-resolution images on drinks with our patented Ripple Maker device. Ripples unique content marketing platform is used by some of the world's leading corporations, hotels, and restaurant chains to deliver an incredible new drinking experience. Are you ready to start making waves with Ripples?

Responsibility and Impact

- You will be responsible for assisting in the development of new recipes and maintaining the quality of the existing product line.
- You will support documentation for nutritional labeling, ingredient labeling, regulatory and claim substantiation. Ensure food packaging compiled as legal requirements through nutritional compliance, and necessary documentation maintained.
- You will ensure consistent regulatory compliance with all production processes and materials.
- Facilitate pilot, scale up and production trial devices and approving on production trial protocols.
- Displays excellent project management skills by tracking and organizing all documentation and communication relevant to active projects

Minimum Qualifications

- B.Sc in food engineer/ food technology - Must
- 2-3 experience in food production facilities- Must
- Experience in Product Innovation or Quality Control.
- Passion, creativity, and desire to deliver the next line of great ripples pods.
- Problem-solving skills and collaborative thinking.

Preferred Additional Qualifications

- Knowledge of food regulations and food safety expected (ex. Labeling, Regulatory and Legal Substantiation experience) a plus.
- Ability to work effectively in cross-functional teams.
