

Reiter Lab

Laboratory of Molecular Immunology & Antibody Engineering

Looking for a scientist

Who are we?

Reiter lab, developing an innovative immunotherapeutic drug for cancer.
Faculty of Biology, Technion, Haifa.

Who are you?

A talented scientist, team player, with great scientific skills, who wants to be a part of a proof of concept of a new drug for cancer, and to gain experience in the fascinating process of drug development in the industry.

Job responsibilities:

- Work with a leading Pharma company
- Provide scientific input for the drug design and development
- Plan and execute experiments for proof of concept:
 - Protein design and expression
 - In-vitro binding assays (ELISA, Flow cytometry)
 - In-vivo PK study
 - In-vivo efficacy study

Requirements:

- M.Sc. in life science or related fields
- Great hands-on capabilities
- Fast learner
- Excellent data analysis skills
- Immunology/cancer background- an advantage
- Hands-on experience in in-vivo mice models for cancer- an advantage
